EXPERIENCES

Lead Backend Developer

Sep. 2022 - Present

Project Metropolis

Toronto, ON

- Optimized Docker build processes reducing average build time from **140s** to **80s** by caching reused layers
- Automated API documentation generation conforming to OpenAPI 3.1 standards, saving **5** hours monthly per developer
- Streamlined deployment via centralized bash scripts, improving system agility and reducing average downtime by **12%**
- Implemented REST API filters, eliminating wasted API calls by **30%** and decreasing server load by **3%** during peak usage
- Engineered and implemented polymorphic comments, likes, view counts, and saves, enhancing platform features and laying the groundwork for future advancements

PROJECTS

[jasoncameron.dev/#/projects](#)

RedditVideoMakerBot | Python, Reddit, FFmpeg, AWS Polly, Playwright, Web Scraping — 🐙

May 2022 - Present

Automated tool for automatically transforming Reddit posts into dynamic videos using code, eliminating traditional editing

- Created a simplified configuration GUI, growing the bot to **6000+** stars on GitHub and **100,000+** downloads
- Enhanced bot's Text-to-Speech (TTS) functionality by reverse engineering the TikTok TTS API, and further improved it by integrating several other TTS engines, such as the AWS Polly API
- Ensured reliable operation of the bot across **10,000+** machines and all major operating systems despite API changes, rate limiting, and copyright concerns

Foodle | Typescript, Svelte, CSS, Python, Flask, Cloudflare, Google Analytics — 🐙

Aug. 2022 - Present

A food-themed twist of Wordle with an additional set of modes and features.

- Listened to user's feedback and grew the game to **650,000+** unique visitors with **5,700,000+** total page views
- Developed, maintained, deployed and hosted the site using Svelte, Cloudflare and GitHub Pages

Scavenger Hunt | Python, Django, CSS, JS, OAuth 2.0 — 🐙

Nov 2022-Present

A scavenger hunt platform engineered to prevent cheating or RNG-based finds while ensuring fairness and integrity

- Refactored the site's architecture by removing reliance on hard-coded configurations. Additionally, introduced functionality to support the execution of multiple concurrent hunts

Screentime Showdown - Best Financial Hack At HTV 8 | Express, React, OAuth 2.0, Meta, Paybilt, Cohere — 🐙

Oct. 2023

Helping people quit social media with the help of a friendly competition and some monetary gain

- Leveraged Meta's OAuth 2.0 and Webhook API to enable real-time detection and response whenever a user opened Facebook or Instagram on any of their devices

PhysioQuest - Best Use Of MongoDB At JAMHacks 7 | Python, Django, HTML, JS, CSS, OpenCV, MongoDB — 🐙

Jun. 2023

Gamifying physiotherapy with AI to encourage consistency and accuracy when completing exercises

- Designed and implemented the backend API and database models using Django and Django Rest Framework
- Integrated our trained CV model to the end user's webcam using Django channels, UDP sockets and HTML's MediaStream, enabling global device compatibility

EDUCATION

William Lyon Mackenzie Collegiate Institute - Toronto, Ontario

Sep. 2022- Jun. 2026

- **Extracurriculars:** School Website (*Backend Lead / Vice-President*), Competitive/Computer Programming Club(*System Administrator*), Engineering Club (*Tech Lead*), School Newspaper (*Photographer / Quality Manager*), A/V Team (*Crew Member / Club Liaison*), School Satirical Newspaper (*Web Developer*), Robotics Club (*Member*)

SKILLS

Languages: Python, Golang, Java, Nim, JavaScript/Typescript, Bash, Processing, HTML/CSS/SCSS

DevOps Tools: Linux, Caddy, Nginx, trafilka, Docker, Cloudflare, WireGuard

Developer Tools: Git, IntelliJ, Django, FastAPI, Flask, React, Svelte, Gin, P5.js, Github Actions, Postman, Tailscale

Databases: MongoDB, PostgreSQL, SQLite, RocksDB, Redis

Productivity and Design Tools: Miro, Notion, Microsoft Suite, Canva, Photoshop, LaTeX
